19th November 2024

TO ALL BIDDERS

**RE: CLARIFICATION NO: 2 – TENDER FOR SUPPLY OF HYDROCARBON DETECTORS FOR
STORM DRAINS AND OIL WATER SEPARATOR DRAINS**

We refer you to the above.

We would like to make the following clarification.

No.	BIDDERS QUERY	KPC RESPONSE
1.	<p>We kindly request a review of the below Specification, Section V of the above tender document.</p> <ul style="list-style-type: none">• No. 16 - Detector shall have Bluetooth capability• No. 4 - OLED Display• No. 7 – Touch Sensitive Screen Display <p>While Bluetooth, OLED and Touch Sensitive Screen Display functionality can be a useful feature, we believe they are not critical to the primary purpose of the hydrocarbon detectors as outlined in the tender. Additionally, excluding this requirement may broaden participation by suppliers, enhance competition, and potentially reduce procurement costs without compromising the effectiveness of the detectors.</p> <p>We kindly urge Kenya Pipeline Company to consider removing or making the above capabilities optional features in the tender specifications. This adjustment would align the tender with practicality and value-driven procurement principles.</p>	<p>The technical specifications issued by KPC for the hydrocarbon detectors are expected to guarantee comprehensive and adaptable functionality of the equipment that will address both current and future needs and challenges.</p> <p>Therefore, there is no need for a review of some of the technical specification.</p>

All other terms and conditions of the tender remain the same.

Yours faithfully,

MAUREEN MWENJE
FOR: MANAGING DIRECTOR
