

KPC Contains Oil Spill in Kisumu

Friday, March 4, 2022, ... Kenya Pipeline Company wishes to confirm that today, 4th March 2022, at approximately 12:30am, an oil spillage was detected along the Sinendet-Kisumu pipeline at Kanyamedha area.

KPC Emergency Response Team was then dispatched to the site and emergency procedures were immediately initiated; among them, containment and recovery of hydrocarbons by reticulation of the product back to pump station (PS) 28 in Kisumu to prevent it from spreading further.

We urge the residents who are near the leak site to immediately keep off the area to enable KPC undertake the repairs to minimize danger.

KPC is working closely with the Provincial Administration, the Police OCPD and other relevant arms of government to ensure safety of members of the public.

We however wish to assure the public that the incident has not affected petroleum products availability both in the country and region. We have sufficient stocks for all the grades across our depots countrywide.

We will continue to share regular updates regarding this incident.

Dr Macharia Irungu, MBS

KPC Managing Director
